The Profi Group Systems platform enables Clients to participate in trading operations on exchanges. It is important to note that speculative trading is associated with significant risks and may result in the partial or complete loss of funds invested.

Clients should consider their investment objectives and risk tolerance before engaging in speculative trading. The market value of digital assets can be highly volatile and fluctuate significantly in a short time. Various factors, including market conditions, political events, and regulation changes, can cause this volatility.

In addition to market risks, there are risks associated with using technology and online trading platforms. For example, technical failures or malfunctions, such as system errors or outages, may result in delays, inaccuracies, or failures in the execution of trades, leading to financial losses.

Profi Group Systems does not provide investment advice or make any guarantees regarding the profitability of speculative trading operations. Clients are solely responsible for their investment decisions and should seek independent financial advice if necessary.

Using the Profi Group Systems platform, Clients acknowledge and accept the risks associated with speculative trading operations and agree to assume full responsibility for any financial losses.

- Volatility: Cryptocurrencies are known for their high volatility and their prices can fluctuate rapidly and unpredictably.
- Regulatory risks: Cryptocurrencies are not regulated in many countries, and regulatory changes or actions could significantly affect their value.
- Security risks: Cryptocurrencies can be vulnerable to cyber attacks, hacks, and theft, which could result in the loss of your investments.

You are solely responsible for assessing these risks and making informed investment decisions. We strongly recommend conducting your own research and seeking professional advice before investing in cryptocurrencies or other digital assets.

Clients can withdraw their funds anytime by sending a request, which will be processed within three banking days. The cost of withdrawing funds to the wallet is 2 USDT.

We also offer clients the option to transfer their digital assets to our platform. The transfer of digital assets to the Platform for use by the general rules is carried out for 1 year. At the same time, this condition limits the Client's ability to withdraw their Digital Assets from the Platform earlier. In this case, the Client shall pay the Platform a penalty in the following amount from the current amount (number) of Digital Assets.

5.2. Payment - methods and processing

Any of these cryptocurrencies is available to the user for depositing and withdrawing funds: Bitcoin(BTC), Litecoin (LTC), USDT (TRC20). The payment processing time is not regulated and depends on the load and performance of the blockchain network (the selected cryptocurrency)

5.3. Fines and penalties

Invested funds will be frozen for three months. After this period, investors may withdraw their funds subject to a 20% commission fee based on the investment amount. Please note that processing withdrawal requests may take up to 30 working days.

After 12 months from the date of investment, investors may withdraw the body of their investment without incurring any commission fees within 5 days.
