Forex

We use an innovative algorithm of the level of global financial companies and banks.

We use effective systems for trading on the currency market from a team of stock market analysts and programmers who have been creating innovative algorithms for profit for more than 8 years based on their own experience.

After 8 years of successful operation of the technology itself, **PROFI GROUP** started using these algorithms to trade the public pool of its clients.

Algorithms are replacing manual trading

Artificial intelligence

A robot processes in minutes the amount of data that a team of 10 analysts can spend days or weeks on

Work 24/7

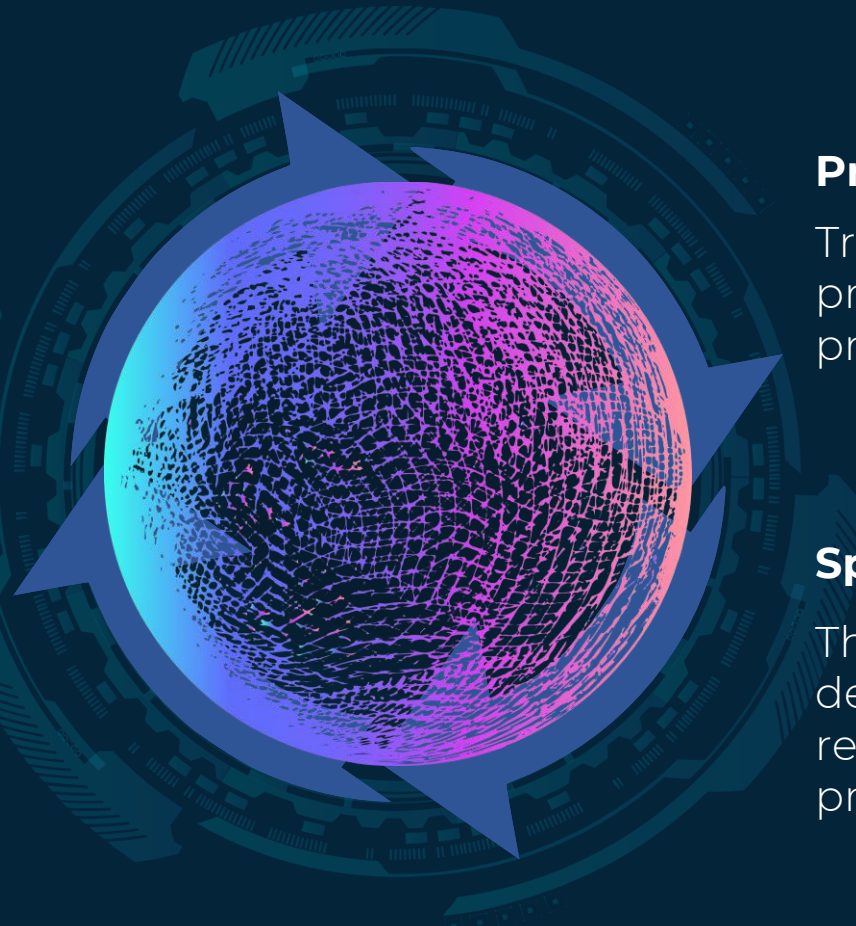

The robot trades completely without human involvement, without payroll, sleep, food, fatigue, breaks or days off

Profitability

Trading is conducted according to a pre-tested algorithm, which is profitable

Speed of operation

The robot instantly executes the decisions made, which leads to reduced losses and increased profits
